Stainless steel - Sliding gates accessories

Stainless steel components

• Use art.903IX to join several tracks.

- Component to be cemented.
- Size the reinforced concrete foundation, check that it is adequate for the forces transmitted by the gate leaf.
- Prepare the track for the installation: insert and/or weld in the holes the suitable rods for reinforced concrete.
- Installation: position the track inside the concrete, check its horizontality by a level bubble and anchor it properly. Cover with a concrete casting.
- Before positioning the gate wait for the concrete to cure completely.

Check the product every 6/12 months.
In case of anomalies, prevent the usage of the hinge and the installed product must be checked by professional personnel.

Responsibly dispose of the product and of its packaging respecting the local legislations of the Country of installation.
